

## **Lab 1 Questions**

Based on your observation of logs, answer the following questions and submit the answers along with the final code:

- When the user opens the app for the first time, mention the order of the callback methods of MainActivity that gets invoked.
  - onCreate(), onStart(), onResume()
- When the user enters valid credentials and clicks on “SIGN IN” button which state does the MainActivity enters?
  - onPause()
- Which callback method will be invoked in the SecondActivity when the SecondActivity is the foreground activity and the user clicks on Back Button?
  - onPause()
